DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swales 6,321,272.

Swales teaches real time control; use of deterministic communication; use of various types of protocols as desired such as TCP/IP and HTTP; use of a server; use of a router; allowing both real time communication for local devices and non-real time communication for a remote device such as user computer over the Internet; use of local network; sending interactive documents, storing information; etc. Swales also teaches that the system allows for external communication without disturbing the real time control. See the abstract; figures; col. 1, lines 14-67; col. 2, line 31 to col. 3, line 15; col. 3, lines 56-67; col. 4, lines 1-33; col. 10, lines 25-41; col. 12, lines 5-14; col. 13, lines 56-60; col. 14, lines 31-34; and the claims.

Swales however does not specifically mention time slots, but does teach that communication between devices is limited to defined periods and that communication from an external device is only allowed within certain intervals.

It would have been obvious to one of ordinary skill in the art to modify Swales to only allow the external communication to only occur within unused time slots of the deterministic communication so as to allow the real time control to be performed

properly yet allow external communication. This would also prevent communication conflicts between messages.

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
